Authorized to work in the US for any employer

Work experience

Field Tech Support Specialist

Motivair Corporation • Memphis, TN

January 2025 to Present

- Deliver onsite technical services supporting mission-critical cooling systems, ensuring optimal performance and minimizing downtime for high-availability environments.

Data Center Technician III

Karavan Technology • Memphis, TN

October 2024 to Present

- Installed, repaired, spliced, and quality-checked fiber optic cable, ensuring reliable connectivity and adherence to industry standards.
- Built and set up Dell and Supermicro servers with NVIDIA GPUs by performing rack and stack procedures for high-performance computing needs.
- Patched and cabled server racks, optimizing network infrastructure and supporting seamless data center operations.
- Tested equipment and servers on the data hall floor, verifying functionality and reducing deployment errors.
- Installed AI servers for the Colossus project in Memphis, TN for xAI, contributing to advanced computing initiatives.

Deskside Support Technician

NIKE • Memphis, TN

June 2022 to February 2025

- Troubleshoot Windows OS and Mac OS issues, resolving user problems and improving system reliability.
- Assisted users with networking troubleshooting and related issues, enhancing connectivity and productivity.
- Managed devices using JamF Enterprise, streamlining asset control and compliance for Apple devices.
- Administered AirWatch accounts and electronic asset management, maintaining accurate inventory and device security.
- Utilized ServiceNow to correlate tickets and issues across the facility, improving response times and issue resolution.
- Imaged and reimaged devices to meet corporate specifications, ensuring consistent deployment and security.
- Configured device security with Zscaler, strengthening endpoint protection and compliance.

Data Center Computer Repair Technician/Server Technician/Configuration Technician III

Ingram Micro Data Center • Millington, TN

January 2022 to December 2023

- Troubleshoot and repaired servers (Cisco, Facebook, Lenovo), restoring functionality and minimizing downtime.
- Built and installed server racks and equipment, supporting scalable data center infrastructure.
- Troubleshoot and configured all server models, ensuring compatibility and optimal performance.
- Repaired and configured HP, Apple, and Lenovo laptops, extending device lifespan and reliability.
- Utilized Ubuntu and Linux OS expertise to support diverse server environments.
- Repaired and configured desktops, tablets, and cellular phones, maintaining operational readiness.
- Imaged and reimaged devices to meet corporate requirements, standardizing deployments.
- Installed high voltage (220v - 480v) power supplies, ensuring safe and reliable power distribution.

- Read and interpreted electric blueprints and schematics to outline server rows for electrical power needs in the data center.

Data Center Server Repair Technician I

Hyve Solutions • Olive Branch, MS

January 2021 to December 2021

- Troubleshoot and repaired Cisco servers, restoring critical systems to operational status.
- Cabled and tested servers to meet specific client requirements, ensuring customized solutions.
- Patched and tested Cisco servers for configuration and final production, supporting seamless deployment.
- Built and installed server racks and equipment, contributing to efficient data center setup.

Computer Repair Technician

Flextronics • Memphis, TN

January 2019 to January 2020

- Troubleshoot, repaired, and configured MacBook Pros (13, 14, and 16) and MacBook Airs, ensuring optimal device performance.
- Diagnosed and resolved issues on Macs and Windows machines, improving user satisfaction and reducing downtime.
